## PROJECTOR LIFT SI-100

**PROJECTOR LIFT PARTLY OPEN**

The projector lift SI-100 is a versatile and innovative product that enables the installation of the projectors in environments where particular aesthetical solutions are needed.

The product has been developed to be installed inside false ceilings in order to hide projector, lift and cable, thus granting the best aesthetic and practical solution.

The SI-100 is supplied with an extremely SILENT Somfy® motor that allows a descent from a minimum of 16 cm. to a maximum of 116 cm.

**FALSE CEILING FIXING SYSTEM**

Moreover, the SI-100 is supplied with a particular system that allows an easy fixing of a panel of your false ceiling by the threaded bars whose height adjustable.

One more interesting element of this lift is a CABLES GATHERING SYSTEM with a raceway where to put the cables of the projector, so they will be hidden and tidy gathered together when the projector lift is going up.
